

## Version 4.1.8 - Build 3614

Release date: 21 November 2013

### 1. What's new?

New features:

- N/A

Improvements

- N/A

### 2. What has to be considered?

- N/A

### 3. Solved Problems

- On some (Plug- In) devices it was not possible to assign (further) Group Addresses to possible Group Objects. Even if enough “memory space” for associations is available in the device itself, ETS reports wrongly that not enough “space” for further associations is available. This problem is solved.

### 4. Download

- New installations (setup): Download and install version 4.1.5 from [MyKNX](#) and subsequently online update of ETS.
- Existing installations: Via ETS4 online update.
